

## **Have you seen these signs on property entrances?**

They are Rural Property Addressing identification signs which have been assigned to properties in rural areas with dwellings in recent years.

Further to this, as a service to our communities, Council has been working on a project to identify properties in the Council area which don't have dwellings but have substantial structures e.g. hay sheds and shearing sheds on the property for ease of location in case of an emergency. The owners of these properties have been contacted advising them of the property address and offering them the chance to purchase an RPA identification sign.

If you have a property that you would like identified please contact Council with the details and an address will be assigned. These addresses are uploaded to Council's property records along with the 000 database and Google maps
